

Revised system for classifying the petroleum resources

Revised resource classification system

Resource class	Project status category		
	Resource category		Description
Historical production (S)	0		Sold and delivered petroleum
Reserves (R)	1		Reserves in production
	2	F A	Reserves with an approved plan for development and operation
	3	F A	Reserves which the licensees have decided to recover
Contingent resources (C)	4	F A	Resources in the planning phase
	5	F A	Resources whose recovery is likely, but not clarified
	6		Resources whose recovery is not very likely
	7	F A	Resources that have not been evaluated
Undiscovered resources (P)	8		Resources in prospects
	9		Resources in leads, and unmapped resources

F = Original estimate of oil and gas resources
A = Additional resources

Resource account as of 31st December 2000

Comparison of the former and revised resource classification systems

Former resource classification							Revised resource classification (July 2001)											
Resource class		Oil Bill Sm³	Gas Bill Sm³	NGL Bill tonnes	Condensate Bill Sm³	Total Bill Sm³ o.e.	Project status category		Oil Bill Sm³	Gas Bill Sm³	NGL Bill tonnes	Condensate Bill Sm³	Total Bill Sm³ o.e.					
0	Production ceased	0.03	114	0.00	0.00	0.15	0	Sold and delivered	2.19	677	0.05	0.04	3.00					
	In production	3.44	1572	0.11	0.09	5.31	1	In production	1.29	980	0.06	0.05	2.44
